III. Three Ways to Start Generating Your Profit:

- You will make profit by buying the Easy1Call™ equipment at discounted prices and receiving commission on the paid monthly services from your customers.
- You can generate "one-time" revenue from hardware sales and recurring revenue every time a customer purchases additional calling time from you through the very robust recharging center at My Account management system.
- Profit generated from sales of phones, monthly plans, calling times and others.

¹ \$2000 with low \$39.95 Monthly Maintenance Fee. ² Varies by Language. ³ Please Contact Easy1Call™ for More Information.

IV. Seven Business Models for Your Reference

- Local Access Network:

Many telephone companies with abundant long distance network resources lacks local access networks. Easy1Call™ uses its IP phone system bundled with regular phone numbers from your company help develop local phone subscribers. In this model, all broadband internet users are your target customers.

- Global Local Call Service:

There are hundreds of thousands of international students study in the U.S. You will be able to profit by selling Easy1Call™ system in the foreign countries around the world. Easy1Call™ Netphone enables those parents of students study abroad to call their children in the U.S. by simply dial a local phone number. The way Easy1Call™ VoIP system setup allows customers around the world with Easy1Call™ VoIP phone to call any number in the U.S. locally, just like dialing a local phone call in the U.S. with 1+ area code and phone number.

- Internet Café

In Greece, a Easy1Call™ customer sells international calling cards to passing foreign sailors. The problem is that the calling cards were very expensive in Greece because local PTT charges a lot for the ITFS numbers. With the installation of Easy1Call™ Netphones in many Internet cafés near harbors, our partners have turned those cyber cafés into international long distance calling centers. As a result, this customer's revenue tripled over the past year. With the presence of Easy1Call™ Netphones in your Internet Café will enable you to have a strong competitive advantage over other competitors.

- Call Center

The main business of a call center in India is to outsource service from call centers in North America. However, the termination fee to India is so high that it restricts their business development to go any further. Easy1Call™ VoIP Technology eliminates termination costs and now they have started providing outbound telemarketing service using Easy1Call™ Netphone. Because of the high call volume from Call Centers in credit card, banking, airline, travel, hotel and other industries, Easy1Call™ Netphone system, savings plan, as well as super low calling rates will help generate more profits for you by saving a significant amount of telecommunication cost.

- Conference Service

Easy1Call™ Net Conference system can help set up a professional cost saving net conference system for a company, and to provide convenient net conference services to enterprises with membership. An under performing ISP partner in Indonesia has become profitable using this business model.

- Enterprise Communication Network

Easy1Call Telecommunication

Crystal Clear Connections for Less™

Business clients especially those multinational companies spend a lot on their internal communication and regular phone services every month. One of the Easy1Call's™ partners in Mexico uses Easy1Call™ Gate Keeper and Easy1Call™ Gateway to set up a virtual telecommunication network, and now its business customers worldwide enjoy the following benefits:

1. Secure internal data transmission (VPN).
 2. Cheap internal and external communication.
 3. Improved conference call.
 4. Bundle foreign regular phone number with local Netphone so their foreign co-workers can call them unlimitedly at local phone rates.
 5. Cut a huge chunk of their communication costs.
 6. Keep using their current infrastructure without any interruption.
 7. Return on investment is overwhelmingly quick.
- For Long Distance Call Service

A local Canadian ISP offers broadband internet access to its subscribers. Recently, they set up Easy1Call™ Gate Keeper there by adding voice services to its existing customers using Easy1Call™ Netphone system. The phone rates offered are much lower than regular phone companies and the voice quality remains crystal clear. As a result, this local ISP has doubled its income and customer base.
